PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.76) with hands-on experience building full-stack applications using the MERN stack, React, and Node.js. Strong foundation in core programming (C, Java, Python) and database management (SQL). Proven track record of academic excellence, including the Highest CGPA Award and Department Topper recognition. Seeking a Software Engineer / Full-Stack Developer internship or entry-level role to apply problem-solving skills and contribute to real-world software development.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C, JavaScript
- Web Development: HTML5, CSS3, JavaScript, React.js, Node.js (MERN Stack)
- Databases: SQL
- Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, Full-Stack Web Development, Version Control (Git), Problem Solving

PROJECTS

Stock Portfolio Tracking Application

React.js, Node.js

- Developed a full-stack web application enabling users to track stock investments and monitor portfolio performance in real time.
- Built a responsive React.js front end with Node.js backend logic and API integration for real-time data updates.

Online Book Library Platform

MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Built a full-stack MERN application allowing users to browse, borrow, and manage a digital book library.
- Implemented CRUD functionality and RESTful APIs, with a MongoDB schema designed for efficient book and user data retrieval.

TNPSC & Competitive Exam Books Collection App

React.js, Node.js, MongoDB

- Designed a web application to organize and provide access to TNPSC and other competitive exam study materials and reference books.
- Built category-wise browsing and search functionality with a scalable database schema for book metadata and categories.

Zero Waste Food App

React.js, Node.js, MongoDB

- Developed a platform connecting surplus food donors (households, restaurants, events) with NGOs and individuals to reduce food wastage.
- Implemented real-time listing and claiming features with a location-based matching flow for timely food pickup and distribution.

Latecomer Management System for College

React.js, Node.js, SQL

- Built a system to digitally record and track student late-arrival entries, replacing manual register-based tracking.
- Implemented a database-backed faculty dashboard with automated repeat-offender flagging for disciplinary follow-up.
